Selling the Area

The three most important things in buying a house are Location, Location, Location.

We provide potential purchasers with information about your neighbourhood to help them make their buying decisions. We list neighbourhood features such as schools, recreation facilities, shopping, transportation, libraries and useful phone numbers.

These features can favourably influence the value of your property by showcasing the environment and lifestyle sought by those willing to pay the most for them.

Qualifying Purchasers

* Identify Prospect's Needs & Wants
* Establish Motivation
* Financial Capability
* Exploring the value they place on specifics of property and neighbourhood

Ordering Home Inspections

Many buyers purchase a property conditional upon having an inspection performed by a qualified home inspector. This normally takes 3-5 hours and costs between $500-700. The buyer usually pays for the inspection. We often recommend the seller pay for the pre-listing home inspection.

Appraisals for the Buyer

In order to get a mortgage, an appraisal will be done by the bank. Lending Institutions may need access to the property to appraise. If the appraisal is less than the purchase price, the buyer may not be able to buy because the bank will commit to a mortgage based only on the appraised value. The buyer pays for the appraisal.

Pricing Your Property

a) Market Conditions:The Greater Toronto Area is presently in a seller's market with Active Listing vs Monthly Solds Ratio being less than 4 (see chart below)

b) Understanding how to price your property

c) Competitive Market Analysis - We will discuss recent sales and listings in your area that can be used to establish market pricing for your property

2. This requires holding back on offers for 2-7 days, in most cases, so that we can market the property effectively.

3. All offers would be presented within one hour in order of registration, whenever possible, on the date of offer presentation.

4. Proper pricing is critical to receive multiple bids
